Sawyer is Proud to Announce a New Partnership with Leave No Trace.

Safety Harbor, FL - April 6th, 2015 - Sawyer, the leader in outdoor protection, is proud to announce a new partnership with the nonprofit organization Leave No Trace. Their mission is "to protect the outdoors by teaching and inspiring people to enjoy it responsibly." Sawyer is proud to be able to work with an organization that teaches people of all ages how to enjoy the outdoors responsibly while reducing environmental impact. We here at Sawyer also want to encourage the appreciation of parks, public lands, and protected areas in the United States and hope ensure the same opportunity is available for generations to come.

Leave No Trace is a member driven ethical program that operates under a very clear umbrellas of principles and goals that Sawyer embraces and hopes to help advocate. In additional to the partnership and the advocacy, Sawyer is committed to ongoing improvements in products and environmental considerations as the company and relationship with Leave No Traces grows. Sawyer will be donating various products to their organization and will work with Leave No Trace to help raise additional funds to support their program.

Sawyer has been in the outdoor industry for over 30 years and the product categories have expanded to include water filtration, insect repellent, sunscreen, and first aid. The diverse product line of simple to use but very technical products are all geared to not only keep you safe from diseases and medical issues, but also to make the outdoor experience easier and more enjoyable. Sawyer water filters are used globally because they are simple, fast, and long lasting. These robust filters are reducing the need to boil water both domestically and internationally where clean water is an even greater issue. Sawyer is very proud to be able to reduce deforestation while also increasing the quality of life through the reduction of waterborne diseases to people to people all over the world.
